

The Cloud-Based FAX Server for Your
AS/400 and IBM Power Systems

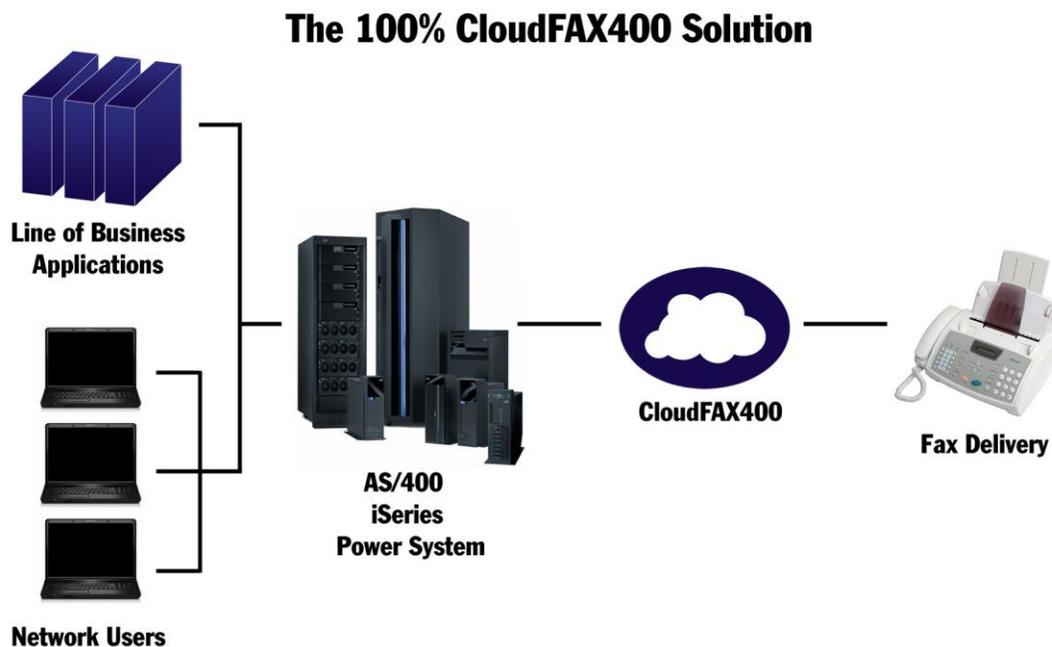

Are You Still Using An Internal Fax Server To Send FAX From Your AS/400 or IBM System i?

Stop! With CloudFAX400 you can ...

- ✓ Eliminate the cost and hassle of your FAX server hardware
- ✓ Save money by dispensing of expensive fixed telephone lines
- ✓ Reduce points of failure in your Enterprise FAX processes
- ✓ Provide a totally secure and hassle-free solution for your FAX transactions
- ✓ Meet all HIPAA and Sarbanes Oxley compliance requirements
- ✓ Get full support and only pay for what you use

The International Presence Group has been developing and delivering enterprise fax solutions to organizations around the world for more than 25 years and we understand how important FAX communication still is for many companies.

CloudFAX400 is our latest enterprise FAX solution, designed specifically for companies sending and receiving FAX transactions from an IBM mid-range system or Windows network.

The Cloud-Based FAX Server for Your AS/400 and IBM Power Systems

With CloudFAX400 you can have all the features usually associated with an on-premise, enterprise-level fax server, conveniently hosted for you in the cloud, including:

- ✓ Desktop Faxing
- ✓ Workflow Integration
- ✓ Automatic Document Routing
- ✓ OCR/Barcode Scanning
- ✓ Application Integration
- ✓ Reporting and Analytics

The screenshot shows a configuration or management interface with various input fields and buttons. It includes sections for 'System Configuration', 'Server Management', and 'User Audit'. There are several dropdown menus, text boxes, and checkboxes, along with a 'Save' button at the bottom right.

Reduce Costs and Improve Reliability

Since CloudFAX400 does not use any FAX hardware or fixed telephone lines, you can slash phone line and hardware maintenance costs, free up internal resources from upgrades and maintenance and create more room in your server room.

Additionally, by eliminating FAX hardware and telephone lines from your enterprise FAX processes, you will improve reliability and efficiency by reducing the number of potential points of failure in your fax processes.

Fully Secure, Compliant and Supported Enterprise FAX service

CloudFAX400 is one of the most secure hosted fax solutions on the market today, so you can meet the toughest security, compliance, and data protection regulations such as HIPAA, SOX, PCI, SAS-70, GLB, and NIST.

All traffic passing through the CloudFAX400 service is SSL protected to provide the highest level of security for your fax communications.

With CloudFAX400 you can pay to send faxes by the page and only pay for what you use, so you can stop paying for expensive hardware and phone lines that only get used occasionally.

CloudFAX400 scales easily to meet the demands of your evolving business requirements and enables you to manage your FAX traffic and get real-time reports through a browser based administration panel on your intranet.

CloudFAX400 is fully supported by our Teams in the USA and the UK, so we will always be here to ensure your fax processes are running smoothly.

Business Continuity and Load Balancing

If you don't feel ready to leap completely into the Cloud just yet, you can also use CloudFAX400 as a seamless business continuity and failover solution for all of your AS/400 and System i FAX processes.

If an issue occurs with your internal fax servers or phone lines, your FAX processes can automatically switch across to your CloudFAX400 service with no negative impact on your business.

You can also run CloudFAX400 alongside your internal fax servers as a Load Balancing Solution to eliminate underutilized FAX Servers and phone lines. CloudFAX400 can provide you with load balancing on demand and provide extra capacity for peak usage or high-volume fax blasts.

Failed Faxes

The screenshot shows the CloudFAX400 web interface. At the top right is the CloudFAX400 logo. Below it is a navigation menu with buttons for Dashboard, Server Management, Config, Alerts, Inbound, Outbound, Logs, and Log Out (matt). The main content area is titled 'Top Failed Numbers Report' and includes a description: 'Displays destinations for faxes and emails which were successfully queued but could not be sent.' Below this is a table with three columns: Position, Number, and Fail Count. The table contains two rows of data. At the bottom right of the interface are two buttons: 'Back to Dashboard' and 'View as XML'.

Position	Number	Fail Count
1	987654321	49
2	prescott@presencebpm.com	31

Automated Alerts

The screenshot shows the 'Alerts' section of the CloudFAX400 web interface. At the top, there is a navigation menu with buttons for 'Dashboard', 'Server Management', 'Config', 'Alerts', 'Inbound', 'Outbound', 'Logs', and 'Log Out (matt)'. Below the menu, there are four alert check boxes, each with a green checkmark icon and the text 'Nothing to report.' followed by a timestamp: 'Status checked: 23 August 2011 @ 10:50:51', 'Status checked: 23 August 2011 @ 10:50:21', 'Status checked: 23 August 2011 @ 10:50:31', and 'Status checked: 23 August 2011 @ 10:50:41'. At the bottom of the alerts section is a 'Refresh' button.

Check Drivers Reading Queue
Nothing to report.
Status checked: 23 August 2011 @ 10:50:51

Check For Messages Left In Relay Status
Nothing to report.
Status checked: 23 August 2011 @ 10:50:21

Check For Statuses Not Updating
Nothing to report.
Status checked: 23 August 2011 @ 10:50:31

Check Imps Communicating with Hosts
Nothing to report.
Status checked: 23 August 2011 @ 10:50:41

Server Management

The screenshot shows the CloudFax400 web interface. At the top, there is a navigation menu with tabs: Dashboard, Server Management (selected), Config, Alerts, Inbound, Outbound, Logs, and Log Out (matt). Below the navigation is a 'Server Management' section with a warning message: 'This allows you to stop and restart the individual FaxCloud components. Please take care when doing this as all of these processes are important to successful fax delivery.' Below this is a table with columns for Component Name, Status, Stop, and Start. Two components are listed: SocketListener and FaxAttendant Runner Service, both with a status of 'Running'. Below the table is a 'License Information' section with a green checkmark and the text: 'This CloudFax400 installation is licensed until 18 August 2013'. Below the license information is a 'New License' button. At the bottom, there are two sections: 'HTTP Server' with a 'Restart HTTP Server' button and 'Server Activity' with a 'View Thread Details' button.

Component Name	Status	Stop	Start
SocketListener	Running	Stop	Start
FaxAttendant Runner Service	Running	Stop	Start

License Information
