

FAX/400

“Enterprise document delivery software
for your iSeries”

Fax and email enable your iSeries with Fax/400

Why Choose Fax/400?

- Send application generated documents such as purchase orders, invoices, order acknowledgements, quotes, picking lists and from any desktop whilst centrally managing all messaging activity.
- Fax from all your desktop applications including Lotus Notes, Microsoft Exchange or Groupwise.
- All application integration with NO PROGRAMMING.
- Automatically send, receive and route enterprise documents via fax from iSeries and Windows platforms
- Automatic dialing, retries and logging
- Security and confidentiality assured
- Seamless integration
- Incoming faxes can be viewed on any connected PC
- Out of hours sending without an operator present

Fax/400 Overview:

In today's highly competitive business environment, fast, accurate communication can make the difference between being successful and being left behind. For iSeries users, that means FAX/400 - the total enterprise solution for sending and receiving faxes and email.

FAX/400 delivers an integrated enterprise fax server solution for AS/400, iSeries and all Windows platforms.

It is a full-function fax system and its prime application in iSeries enterprises is the integration of fax with Line-of-Business applications, without any programming.

FAX/400 was one of only two software products adopted by IBM at the initial launch of the AS/400.

The Fax/400 SMTP Email Gateway is available for automatically emailing iSeries documents via IMPS2 Lite, using your existing SMTP email server. The latest Release-P version 4.01 is available to maintenance-paying customers.

As well as providing a total fax solution to both iSeries terminal and PC connected Users, Fax/400 provides a price performance that is unmatched in the market today by its support for our strategic corporate communications servers iMPS2 Lite and iMPS 2 Enterprise (Integrated Message Processing Server).

As a fax server, the iMPS2 range allows for multiple fax lines in a single unit. It connects directly to the network, communicating via TCP/IP. It runs at speeds up-to 33.6 kbps, provides full Landscape faxing, scale-to-fit Forms Merging, PCL print rendering and application email transmissions as standard.

Contact us today to discover how Fax/400 can help you do business better ...
