*“Automatically monitor and alert on your
business-critical messaging processes 24/7”*

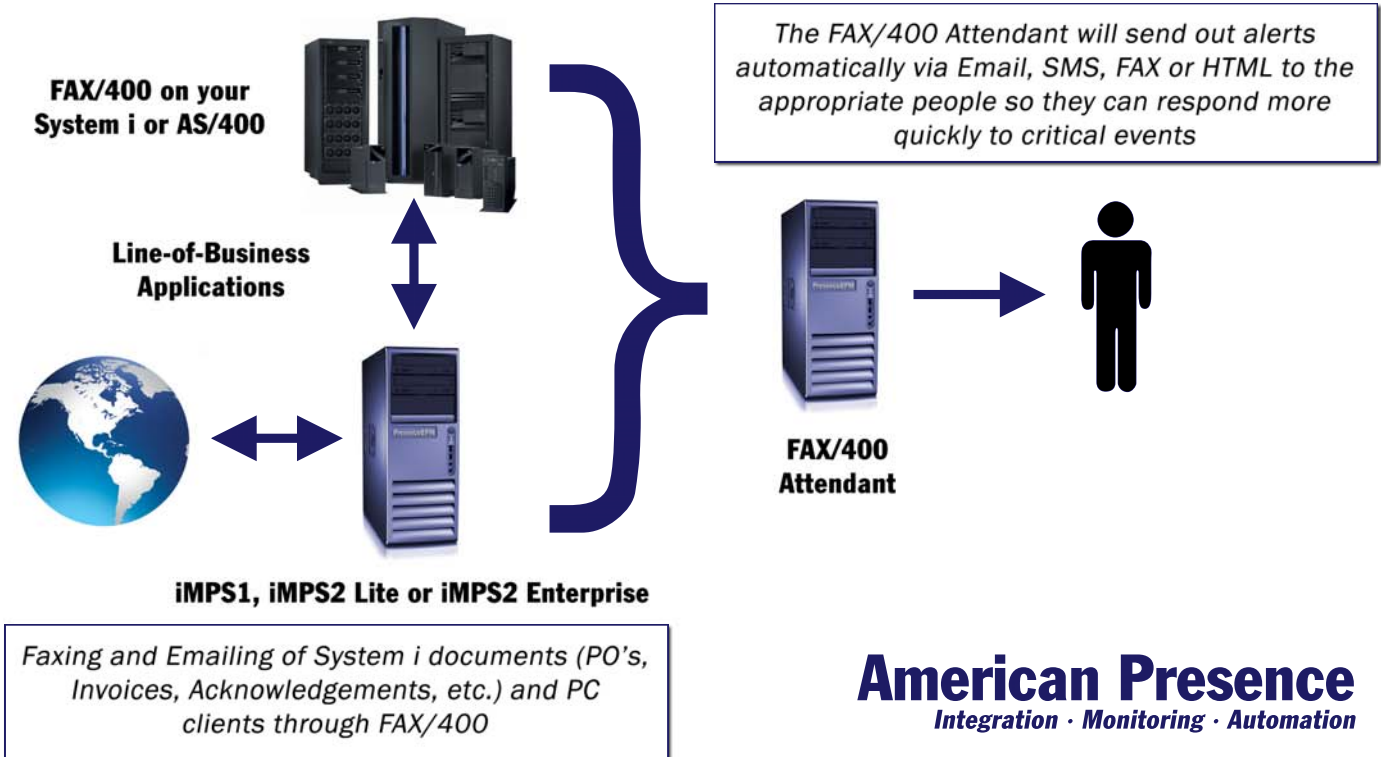

Fax/400 System Activity Monitoring and Alerts

Do you manually monitor your FAX/400 system?
Would you like to be automatically notified of any FAX/400 issues?

American Presence, Inc. has developed the FAX/400 Attendant to instantly alert you to the following events:

- The FAX/400 drivers have stopped running on your System i or AS/400
- The iMPS1, iMPS2 Lite or iMPS2 Enterprise servers are not running or not communicating properly with your System i or AS/400
- The FAX status is not being updated and that the document has become frozen on the FAX queue
- The iMPS phone lines are not working correctly
- It can even automatically restart your drivers if they have stopped responding (iMPS1 only)

The FAX/400 Attendant has been developed using our business process management solution PresenceBPM and will automatically monitor and alert you to any issues with your messaging processes 24/7. Alerts can be sent to you and your team as an Email, FAX, SMS (Cell phone or pager) or even HTML.
